Index to Volume 92

Action potential, nerve; energy transfer and molecular switching, 185
Algae, a simple model for cell volume and developmental compartments in nutrient limited cyclostat cultures of, 435
Amino acid replaceability and the self-facilitation of evolution, 293
Antibody binding to the chromatin subunit, interactive computer surface graphic study of, 97
Antibody combining site of immunoglobulin MOPC167, possible three-dimensional backbone folding around, 417
Antigen–heterogeneous antibody systems, multivalent, analysis of binding curves in, 57
Assembled communities, the structure of, 103

Bacillus subtilis, a three-dimensional model reconstruction of pole assembly in, 127
Backbone folding, three-dimensional, possible, around antibody combining site of immunoglobulin MOPC167, 417
Bacterial growth, simulated, 23
BARCHAS, J. D. (see KING, R.), 373
BARRETT, A. N. and BURDETT, I. D. J., A three-dimensional model reconstruction of pole assembly in *Bacillus subtilis*, 127
BARRETT, T. W., Energy transfer and molecular switching I. The nerve action potential, 185
Base pairs, C–A, in transfer ribonucleic acids and codon–anticodon complexes, 163
Binding of an antibody to the chromatin subunit, interactive computer surface graphic study of, 97
Binding curves in multivalent antigen–heterogeneous antibody systems, analysis of, 57
Biological processes, cyclic, entropy flow in, 15
BOSSERMAN, R. W. and HARARY, F., Demiarcs, creaons and genons, 241
BREMER, H., Simulated bacterial growth, 23
BROCKMAN, W. H., Ladder network prediction of transients in linear spatially inhomogeneous cables, 469
BURDETT, I. D. J. (see BARRETT, A. N.), 127
BUSTIN, M. and FELDMANN, R. J., Interactive computer surface graphic study of the binding of antibody to the chromatin subunit, 97

C–A base pairs in transfer ribonucleic acids and codon–anticodon complexes, 163
Cables, spatially inhomogeneous, linear, ladder network prediction of transients in, 469
CARPENTER, S. R., Effect of control measures on pest populations subject to regulation by parasites and pathogens, 181
Catastrophe theory of dopaminergic transmission: a revised dopamine hypothesis of schizophrenia, 373

Cell volume and developmental compartments in nutrient limited cyclostat cultures of algae, a simple model for, 435
Cellulose synthesis *in vitro* from plant extracts, towards, 483
Chemiosmotic hypothesis and the nature of the mitochondrial protonmotive force, 255
Chemosensory responses of microorganisms: asymmetric diffusion as the limit of a biased random walk, 345
Chromatin subunit, interactive computer surface graphic study of the binding of an antibody to, 97
Circadian rhythms, a 'simple clock' approach of; an easy way to predict the clock's singularity, 227
CLAPP, R. E., Entropy flow in cyclic biological processes, 15
Codon–anticodon complexes, C–A base pairs in transfer ribonucleic acids and, 163
Communities, assembled, the structure of, 103
Computer surface graphic study of the binding of an antibody to the chromatin subunit, 97
CONRAD, M. and VOLKENSTEIN, M. V., Replaceability of amino acids and the self-facilitation of evolution, 293
COOPER, W. S., Natural decision theory: a general formalism for the analysis of evolved characteristics, 401
Coronary artery bypass graft surgery, application of symbolic logic analysis of cause of death to 108 patients after, 267
COUTRE, S. E., STANFORD, J. M., HOVIS, J. G., STEVENS, P. W. and WU, T. T., Possible three-dimensional backbone folding around antibody combining site of immunoglobulin MOPC167, 417
Creaons, genons and demiarcs, 241
CRIPPA, P. R., Electronic effects in the pigmented cuticle of insects, 369
Cuticle, pigmented, of insects, electronic effects in, 369
Cuticle of social wasps, thermoelectric (Seebeck) effects of, 497
Cyclic biological processes, entropy flow in, 15
Cyclostat cultures, nutrient limited, of algae, a simple model for cell volume and developmental compartments in, 435

Death in humans, symbolic logic analysis of cause of; application to 108 patients after coronary artery bypass graft surgery, 267
DEMETRIUS, L., The Malthusian parameter and the effective rate of increase, 141
Demiarcs, creaons and genons, 241
Developmental compartments and cell volume in nutrient limited cyclostat cultures of algae, a simple model of, 435
Diffusion, asymmetric, as the limit of a biased random walk; chemosensory responses of microorganisms, 345
DIRKS, G. (see GUST, D.), 39
Dopaminergic transmission, catastrophe theory of; a revised dopamine hypothesis of schizophrenia, 373

Electroencephalogram, stochastic aspects of the generation of, 317
Electronic effects in the pigmented cuticle of insects, 369

Energy transfer and molecular switching; the nerve action potential, 185
Entropy flow in cyclic biological processes, 15
Environments, random, sex in, 301
Evolved characteristics, a general formalism for the analysis of; natural decision theory, 401
Evolution, replaceability of amino acids and the self-facilitation of, 293
Evolution of Rh polymorphism, family size and, 119
Exchange reactions, monomer–polymer, reversible, with microtubules and other biopolymers, a quantitative treatment of, 85
Extracellular ion transport, time-dependent, 363

Family size and evolution of Rh polymorphism, 119
FELDMANN, R. J. (see BUSTIN, M.), 97
FERRIER, J. M., Time-dependent extracellular ion transport, 363
Folding, backbone, three-dimensional, possible, around antibody combining site of immunoglobulin MOPC167, 417
FRISCH, H. L. (see GOTHAM, I. J.), 435

GANDOLFI, A. and STROM, R̊., Analysis of binding curves in multivalent antigen–heterogeneous antibody systems, 57
Genetically based kin recognition systems, 209
Genons, demiarcs and creaons, 241
GETZ, W. M., Genetically based kin recognition systems, 209
GOTHAM, I. J. and FRISCH, H. L., A simple model for cell volume and developmental compartments in nutrient limited cyclostat cultures of algae, 435
Growth, simulated, of bacteria, 23
GUST, D. and DIRKS, G., Stereochemistry of oligomeric proteins, 39

HARARY, F. (see BOSSERMAN, R. W.), 241
HINES, W. G. S. (see MOORE, W. S.), 301
HOVIS, J. G. (see COUTRE, S. E.), 417
Humans, symbolic logic analysis of cause of death in; application to 108 patients after coronary artery bypass graft surgery, 267
HUTCHINS, G. M. (see MOORE, G. W.), 267

Immunoglobulin MOPC167, possible three-dimensional backbone folding around antibody combining site of, 417
Insects, electronic effects in the pigmented cuticle of, 369
Internal state variables, behavior of microorganisms and, 359
Intramembrane events during the nerve impulse, 1
Ion transport, extracellular, time-dependent, 363
ISHAY, J. S. (see SHIMONY, T. R.), 497

Kin recognition systems, genetically based, 209
KING, R., RAESE, J. D. and BARCHAS, J. D., Catastrophe theory of dopaminergic transmission: a revised dopamine hypothesis of schizophrenia, 373

KRISTOFFERSON, D. and PURICH, D. L., A quantitative treatment of reversible monomer–polymer exchange reactions with microtubules and other biopolymers, 85

Ladder network prediction of transients in linear spatially inhomogeneous cables, 469
LAPIDUS, I. R., Behavior of microorganisms and internal state variables, 359
LAPIDUS, I. R., Chemosensory responses of microorganisms: asymmetric diffusion as the limit of a biased random walk, 345

MALCOLM, A. D. B., Thermophiles and RNA stability, 479
MALPRESS, F. H., On the chemiosmotic hypothesis and the nature of the mitochondrial protonmotive force, 255
Malthusian parameter and the effective rate of increase, 141
MĂRGINEANU, D.-G. (see SCHOFFENIELS, E.), 1
Microorganisms, chemosensory responses of; asymmetric diffusion as the limit of a biased random walk, 345
Microorganisms and internal state variables, behavior of, 359
Microtubules and other biopolymers, a quantitative treatment of reversible monomer–polymer exchange reactions with, 85
MIKELSAAR, R., C–A base pairs in transfer ribonucleic acids and codon–anticodon complexes, 163
Mitochondrial protonmotive force, on the chemiosmotic hypothesis and the nature of, 255
Molecular switching and energy transfer; the nerve action potential, 185
Monomer–polymer exchange reactions, reversible, with microtubules and other biopolymers, a quantitative treatment of, 85
MOORE, G. W. and HUTCHINS, G. M., Symbolic logic analysis of cause of death in humans: application to 108 patients after coronary artery bypass graft surgery, 267
MOORE, W. S. and HINES, W. G. S., Sex in random environments, 301
MOPC167 immunoglobulin, possible three-dimensional backbone folding around antibody combining site of, 417

Natural decision theory: a general formalism for the analysis of evolved characteristics, 401
Nerve action potential; energy transfer and molecular switching, 185
Nerve impulse, intramembrane events during, 1
Nutrient limited cyclostat cultures of algae, a simple model for cell volume and developmental compartments in, 435

Oligomeric proteins, stereochemistry of, 39

Parasites and pathogens, effect of control measures on pest populations subject to regulation by, 181

Pathogens, effect of control measures on pest populations subject to regulation by parasites and, 181
Patients, 108, after coronary artery bypass graft surgery; symbolic logic analysis of cause of death in humans, 267
Pest populations subject to regulation by parasites and pathogens, effect of control measures on, 181
Pigmented cuticle of insects, electronic effects in, 369
Plant extracts, towards cellulose synthesis *in vitro* from, 483
Pole assembly in *Bacillus subtilis*, a three-dimensional model reconstruction of, 127
Polymer–monomer exchange reactions, reversible, with microtubles and other biopolymers, a quantitative treatment of, 85
Polymorphism, Rh, family size and evolution of, 119
Populations, pest, subject to regulation by parasites and pathogens, effect of control measures on, 181
Proteins, oligomeric, stereochemistry of, 39
Protonmotive force, mitochondrial, on the chemiosmotic hypothesis and the nature of, 255
PURICH, D. L. (see KRISTOFFERSON, D.), 85

QUADER, H. (see ROBINSON, D. G.), 483

RAESE, J. D. (see KING, R.), 373
Random environments, sex in, 301
Random walk, biased, asymmetric diffusion as the limit of; chemosensory responses of microorganisms, 345
Rh polymorphism, family size and evolution of, 119
RNA stability and thermophiles, 479
ROBINSON, D. G. and QUADER, H., Towards cellulose synthesis *in vitro* from plant exctracts, 483

Schizophrenia, a revised dopamine hypothesis of; catastrophe theory of dopaminergic transmission, 373
SCHOFFENIELS, E. and MĂRGINEANU, D.-G., Intramembrane events during the nerve impulse, 1
Seebeck effects of the cuticle of social wasps, 497
Self-facilitation of evolution and the replaceability of amino acids, 293

MÄRGINEANU, D.-G. (see SCHOFFENIELS, E.), 1
Microorganisms, chemosensory responses of; asymmetric diffusion as the limit of a biased random walk, 345
Microorganisms and internal state variables, behavior of, 359
Microtubules and other biopolymers, a quantitative treatment of reversible monomer–polymer exchange reactions with, 85
MIKELSAAR, R., C–A base pairs in transfer ribonucleic acids and codon–anticodon complexes, 163
Mitochondrial protonmotive force, on the chemiosmotic hypothesis and the nature of, 255
Molecular switching and energy transfer; the nerve action potential, 185
Monomer–polymer exchange reactions, reversible, with microtubules and other biopolymers, a quantitative treatment of, 85
MOORE, G. W. and HUTCHINS, G. M., Symbolic logic analysis of cause of death in humans: application to 108 patients after coronary artery bypass graft surgery, 267
MOORE, W. S. and HINES, W. G. S., Sex in random environments, 301
MOPC167 immunoglobulin, possible three-dimensional backbone folding around antibody combining site of, 417

Natural decision theory: a general formalism for the analysis of evolved characteristics, 401
Nerve action potential; energy transfer and molecular switching, 185
Nerve impulse, intramembrane events during, 1
Nutrient limited cyclostat cultures of algae, a simple model for cell volume and developmental compartments in, 435

Oligomeric proteins, stereochemistry of, 39

Parasites and pathogens, effect of control measures on pest populations subject to regulation by, 181

Pathogens, effect of control measures on pest populations subject to regulation by parasites and, 181
Patients, 108, after coronary artery bypass graft surgery; symbolic logic analysis of cause of death in humans, 267
Pest populations subject to regulation by parasites and pathogens, effect of control measures on, 181
Pigmented cuticle of insects, electronic effects in, 369
Plant extracts, towards cellulose synthesis *in vitro* from, 483
Pole assembly in *Bacillus subtilis*, a three-dimensional model reconstruction of, 127
Polymer–monomer exchange reactions, reversible, with microtubles and other biopolymers, a quantitative treatment of, 85
Polymorphism, Rh, family size and evolution of, 119
Populations, pest, subject to regulation by parasites and pathogens, effect of control measures on, 181
Proteins, oligomeric, stereochemistry of, 39
Protonmotive force, mitochondrial, on the chemiosmotic hypothesis and the nature of, 255
PURICH, D. L. (see KRISTOFFERSON, D.), 85

QUADER, H. (see ROBINSON, D. G.), 483

RAESE, J. D. (see KING, R.), 373
Random environments, sex in, 301
Random walk, biased, asymmetric diffusion as the limit of; chemosensory responses of microorganisms, 345
Rh polymorphism, family size and evolution of, 119
RNA stability and thermophiles, 479
ROBINSON, D. G. and QUADER, H., Towards cellulose synthesis *in vitro* from plant exctracts, 483

Schizophrenia, a revised dopamine hypothesis of; catastrophe theory of dopaminergic transmission, 373
SCHOFFENIELS, E. and MĂRGINEANU, D.-G., Intramembrane events during the nerve impulse, 1
Seebeck effects of the cuticle of social wasps, 497
Self-facilitation of evolution and the replaceability of amino acids, 293
Sex in random environments, 301
SHIMONY, T. R. and ISHAY, J. S., Thermoelectric (Seebeck) effects of the cuticle of social wasps, 497
SIEGEL, A., Stochastic aspects of the generation of the electroencephalogram, 317
'Simple clock' approach of circadian rhythms: an easy way to predict the clock's singularity, 227
STANFORD, J. M. (see COUTRE, S. E.), 417
Stereochemistry of oligomeric proteins, 39
STEVENS, P. W. (see COUTRE, S. E.), 417
Stochastic aspects of the generation of the electroencephalogram, 317
